Opportunity Land for Progressive Industry

The HUB of Canada's Largest Market Area

If you are looking for planned Industrial Sites, good labor pool, adequate transportation facilities, proximity to large markets, adequate public utilities, good educational and recreational facilities — come to "OPPORTUNITY LAND" — comprising the cities, towns and villages of the counties of Huron, Perth, Waterloo and Wellington.

The market area within a 150 mile radius encompasses over:

75%	of the population of Ontario
70%	of the rural population of Ontario
78%	of the urban population of Ontario
84%	of all manufacturing in Ontario

THE COMPANY YOU'LL KEEP

You're in good company when you locate in Ontario's Opportunity Land. There are scores of diversified products that are household words — brands you know and companies you respect. Consider the economic advantages from the standpoint of service industries such as welding and steel fabricating, machine tools, various types of molding, plastics, rubber extrusions, etc.

Yours for the asking are Plant Site Surveys, Listings of available Plants and Buildings, Marketing Information. Write, wire or telephone your confidential inquiries

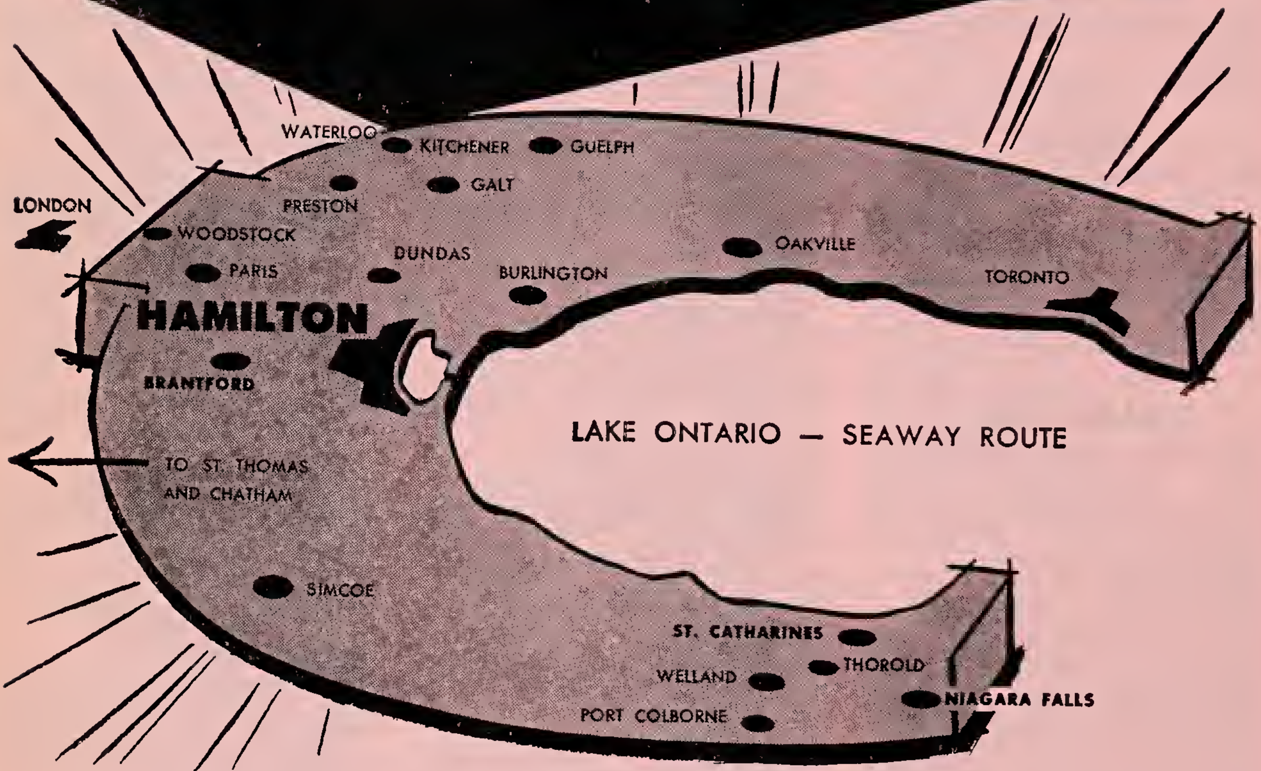
HAMILTON...
Hub of Canada's Golden Horseshoe



At the heart of the greatest concentration of industrial activity in Canada, the Port of Hamilton is pre-eminent among all ports in tonnage of Seaway cargo handled. Modern harbour facilities are being continuously expanded to accommodate an ever-increasing volume of traffic to and from the four corners of the world. Highways and railways radiating to all points in Southern Ontario offer the low-cost route for your shipments. Mark your shipments to and from Southern Ontario . . . "via the Port of Hamilton."

QUEBEC

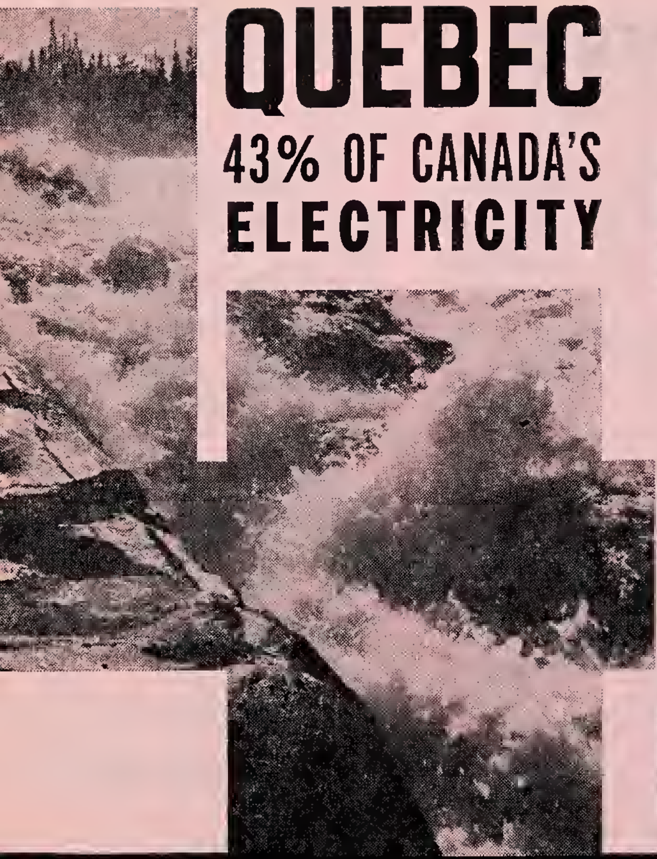
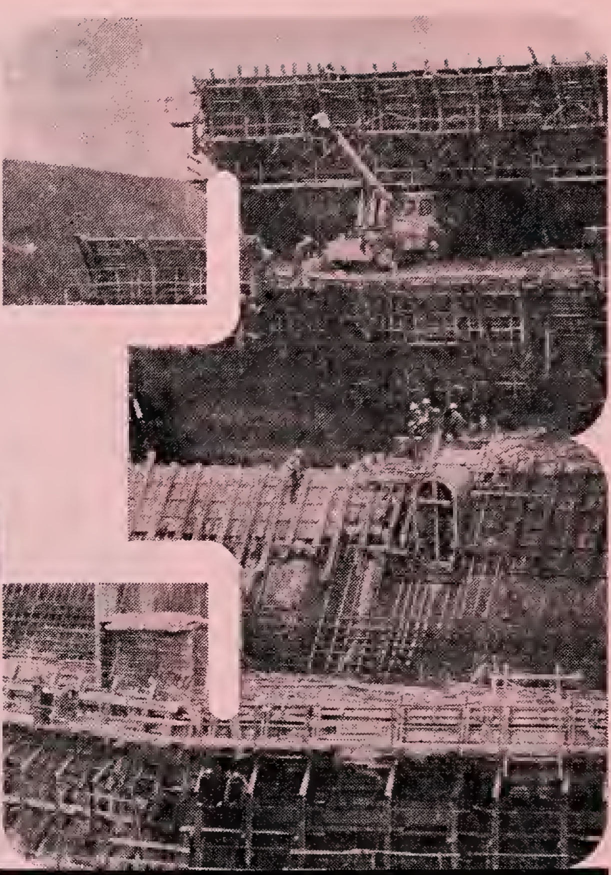
43% OF CANADA'S ELECTRICITY





The Province of Quebec produces 50 billion kilowatthours — 43% of all the electric energy generated annually in Canada.

In fact, per capita production of electricity in Quebec is the highest in the world.

To a marked degree, this tremendous power development is the result of

- established industries expanding their operations . . .
- new companies seeking to take advantage both of Quebec's vast natural resources and of its incomparable geographic proximity to world markets . . .
- the advantageous cost of electricity...

This ever-increasing demand for electricity has dictated construction of five new power-producing plants of the gigantic Manicouagan-Aux Outardes project. The first will be in operation by 1965 and the others will follow in rapid succession.

By 1975, power generated by Quebec's hydro-electric installations will be increased by more than

5,000,000 KILOWATTS
